This document provides key investor information about the Mutual Fund European Reliance Growth Domestic Equity Fund. It is not marketing material. This information is provided in accordance with Law 4099/2012 for the understanding of the nature and risks of investing in this mutual fund. You are advised to read it so you can make an informed decision about whether to invest.

MUTUAL FUND EUROPEAN RELIANCE GROWTH DOMESTIC EQUITY FUND - (UNIT CLASS R)

The management company is European Reliance Asset Management M.F.M.C.
Member of European Reliance Group of Companies
ISIN: GRF000158003

Investment Objective and Investment Policy

The mutual fund invests in a diversified portfolio of Greek stocks, focusing on large-cap companies with strong fundamentals (profitability, capital structure, liquidity) and good growth prospects. The objective of mutual fund is to benefit the shareholders, by achieving positive returns driven by capital gain and income.

The assets of the mutual fund in are invested in a diversified equity portfolio focusing on large cap companies. The investments above consist at least 65% of the fund's net assets. The profit and the proceeds of the mutual fund are reinvested.

The mutual fund may proceed to the use of derivatives for the coverage of risks or the coverage of its investment objectives, that may have an impact on its performance.

The currency used in the investments of the mutual fund is the Euro (EUR) and the benchmark appointed is the General Index of the Athens Stock Exchange, which is provided by the manager "Athens Exchange (ATHEX)" that is registered in the Registry of article 36 of EU Regulation 2016/1011.

The mutual fund is actively managed with reference to the benchmark, since the management company selects the investments of the mutual fund on a discretionary basis in relation to the above benchmark, so that the mutual fund benefits by specific investment opportunities.

The securities invested by the mutual fund could be included in the benchmark. However, the weighting factors may vary compared to the ones of the benchmark. The investment strategy may limit the impact, on the deviation of the portfolio figures from the benchmark. This deviation may be important. The benchmark of the mutual fund is used for the above reasons and for comparison purposes of the returns.

The transaction cost on the assets of the mutual fund's portfolio has an impact on its return.

The mutual fund is addressed to investors with long-term horizon, without a time commitment. The minimum recommended holding period of the units is 5 years.

The investor may request the redemption or repurchase of the units at any working day by submitting a respective application form.

Risk and Reward Profile

Lower risk ← Higher risk
Lower expected rewards Higher expected rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The risk - reward profile presents the price fluctuations of the mutual fund's investments over the past five years.
- The historic data, as used for the calculation of the synthetic indicator, may not be a reliable indication of the future risk profile of the mutual fund.
- The risk category of the mutual fund does not remain the same, but on the contrary, it may change over time. The lowest risk category does not imply a risk-free investment.
- The mutual fund belongs to risk category No. 6 because over the past five years it presented high volatility. The mutual fund's portfolio invests in equity securities that present higher volatility compared to other forms of investment, such as corporate and government bonds. Moreover, the mutual fund is classified in a high-risk category, due to the limited geographical spread of the investments, as it invests only in Greek securities.

- The assets of the mutual fund are affected by the following risks:

- **Market Risk:** Due to the intense volatility of the stock prices included in this mutual fund.
- **Sovereign risk:** It is the risk that is related with the institutional and regulatory framework of the State in which the assets of the mutual fund are invested.
- **Liquidity Risk:** A significant part of the assets is invested in financial instruments, which, under certain circumstances, may present relatively low liquidity.

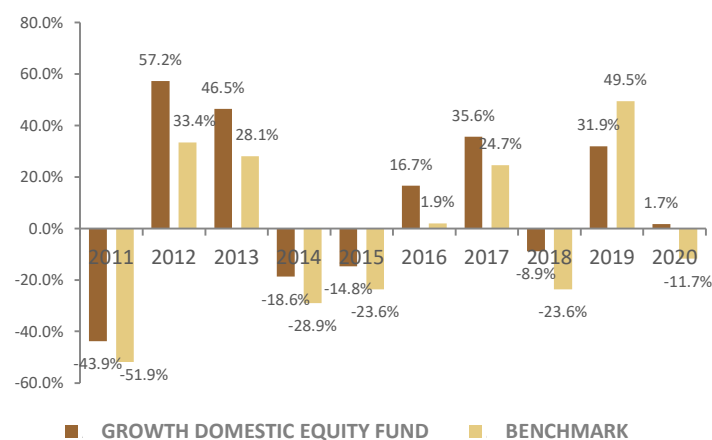

Charges

The charges refer to unit class (R) of the mutual fund and cover the operating expenses of the mutual fund that include the fees for promoting the subscription and distribution. These charges decrease the possible growth/ return of your investment.

One-off charges before or after the investment	
Commission of subscription	3%
Commission of redemption	1%
It is the highest rate with which you may be charged either during the participation in the investment or the redemption of your units.	
Charges paid by the assets of the mutual fund over the year.	
Ongoing charges	2,26%
Charges taken under certain specific conditions	
Performance fees	-

- The indicated commissions for subscription and redemption may in certain cases have lower prices. Please contact your investment consultant for further information.
- The ongoing charges calculation is based on the results of the 2020 fiscal year. The ongoing charges may differ every year. The annual report of the mutual fund for every fiscal year includes details on the exact charges imposed.
- The ongoing charges do not include the transaction cost on the assets of the portfolio of the mutual fund, except for the commissions for subscription and redemption paid by the mutual fund at the subscription or redemption of units of another organization of collective investments.
- For further information on the charges, please see section IV. "General information on mutual funds", paragraph "commissions, remuneration and expenses", of the prospectus, available on the website <https://www.europistiaedak.gr>.

Past Performance

- **Benchmark:**
01/01/2007 – today: General Index of the Athens Stock Exchange.
- The mutual fund was launched in 1990 and previous years' return has been calculated in Euro.
- The calculation of the previous years' returns includes the annual charges, except for the commissions for subscription and redemption. The charges that have been taken into consideration in the calculation of the returns are the following: management fees, custodial fees, fees and commissions of transactions performed on the account of the mutual fund, any tax related to the mutual fund and imposed by the current legislation, expenses from the publications that are required by the Law, the remuneration of the certified public accountants, the expenses for the mandatory briefing of the shareholders, according to the legislation in force and the contribution to the Capital Market Commission.

- The diagram has a limited value as a guide for the future returns of the mutual fund since mutual funds do not have guaranteed returns and previous years' returns do not guarantee future returns.
